

INTERNATIONAL TABLE TENNIS FEDERATION

Racket Control Report - Form 3

Status: January 2016

Logo

Event Name Date

Test type:	
Tick:	<input checked="" type="checkbox"/>
After	<input type="checkbox"/>
Before	<input type="checkbox"/>
Voluntary	<input type="checkbox"/>

Date:

Time:

Table:

Player:	Family name	Name
----------------	-------------	------

Number	Association
--------	-------------

RACKET COVERING

Red side

Supplier name	Rubber name / Brand	LARC <input type="checkbox"/>
---------------	---------------------	----------------------------------

Black side

Supplier name	Rubber name / Brand	LARC <input type="checkbox"/>
---------------	---------------------	----------------------------------

Flatness	-0.5 / +0.2 mm
Concave: - _____ . _____ mm.	
or convex: + _____ . _____ mm.	

Flatness	-0.5 / +0.2 mm
Concave: - _____ . _____ mm.	
or convex: + _____ . _____ mm.	

Thickness (Rubber+Sponge+Glue)	avg. ≤ 4.00 mm**
Thickness _____ . _____ mm.	
Total thickness*	_____ . _____ mm.
<small>*(flatness, if convex + thickness)</small>	<small>** allowable tolerance ≤ 4.04 mm</small>

Thickness (Rubber+Sponge+Glue)	avg. ≤ 4.00 mm**
Thickness _____ . _____ mm.	
Total thickness*	_____ . _____ mm.
<small>*(flatness, if convex + thickness)</small>	<small>** allowable tolerance ≤ 4.04 mm</small>

NOTE : In the case of a convex rubber, the results of the flatness test shall be added to the result of the thickness test

If a side is convex and the reverse side is flat or convex, add the flatness measurement of this side to the thickness measurement. If a side is convex and the reverse side is concave (negative measurement in the flatness test), and the sum of the two flatness measurements is positive, add this sum to the thickness measurement. If this sum of the two flatness measurements is negative, add nothing.

VOC	≤ 3.00 ppm*
Background level reading (A): _____ . _____ ppm.	
Reading after 20 seconds (B): _____ . _____ ppm.	
Real reading (B - A):	_____ . _____ ppm.

VOC	≤ 3.00 ppm*
Background level reading (A): _____ . _____ ppm.	
Reading after 20 seconds (B): _____ . _____ ppm.	
Real reading (B - A):	_____ . _____ ppm.

* allowable tolerance ≤ 3.30 ppm

Other test irregularities

Actions taken by the RCC/Referee at Call Area

Voluntary test failure	
Player was informed of the irregularities found	<input type="checkbox"/>
Player was advised to seek the Referee's advice	<input type="checkbox"/>

Compulsory test failure	
Results reported to the Referee	<input type="checkbox"/>

Referee's decision (to be filled in by the referee):
Racket Control failure added to referee report (Racket control sheet) <input type="checkbox"/>
Copy of the RC form given to the player/delegate <input type="checkbox"/>

Note:
<i>This report or its copy should not be given to anybody, except to the referee and player/delegate on request. In case of failure in any of the tests (except for irregularities the name of the player will be registered in ITTF's website and a letter will be sent to his/her association.</i>

For failures at compulsory racket control only

Official's name and signature

Player's signature

Referee's name and signature
